Fastgsm Bcm 1.0.0.29 !NEW!

You need to enter a unique unlock or network unlock code on your phone. FastGSM BCM reads your unique unlock codes from supported FGSCMA software (including using the slave network functionality, for example, slave on Siemens S457i). **IMPORTANT!** If your warranty stickers or barcodes are damaged or lost by codes, even if you contact an authorized service center and the manufacturer restores your warranty obligations, you will need to pay for service. \* After activating the wireless Internet access point, an SMS package with access parameters will be issued, which must be entered in the appropriate tab on the "Profile" WEB resource and saved. To receive timely updates and the latest versions of the software, you must install a special version of the software that supports the wireless network on your personal computer from the manufacturer's website. (file: wp7\_update\_setup\_sbg.cfm). Attention! All rights to the materials located on the Cibir.ru website are protected in accordance with the legislation of the Russian Federation, including copyright and related rights. For any use of site materials, a hyperlink to cibirrus.ru or is required.
