Plastic Animation Paper is an application designed to combine both hand-drawn sketches and animation. Starting with a blank canvas, it allows you to animate your drawings with a combination of cutting and pasting to shape your animations. You can go into the complete editing mode by opening the layers panel and adding layers, changing their transparency and playing at custom time rates. For example, you might want to use the new Team Playground, a simple way for your employees to publish

and distribute your app. You'll need to enable the playground in your Developer Console. After that, you and your team can invite your employees to test your app. They will get an invitation that lets them easily install the app from the Play Store. If the app installs, you can keep it or remove it from their device, but your team will get notified of any issues or issues with the play store. Also, if you want to test it yourself, you can use a real phone, tablet, or emulator. When your team members are ready, click the "Actions" tab and go to Publish. From there, you'll be able to set a title, description, and privacy, and choose a category to include your app in. And that's it! Now, your employees can easily find and install your app from the Play Store. We hope you enjoy the new Team Playground, and if you have any questions, feel free to leave a comment here or ask your Google representative on Twitter.
