�� Equity Evaluator Stock Quotes, Analysis and Picks are an innovative and a very straightforward approach to analyze stocks with unique and complex financial data that is hard to find online. �� The data is returned in a timely manner, and the user can monitor and track his/her stocks and sectors at a same time. �� A comprehensive set of reports are generated using the information received for the candidate stocks. �� All the information is generated in a very user friendly interface. �� We provide a set of standard reports for the user, and if our user wants to perform advanced analysis or build his/her own reports he/she can do so using our Java Script application. �� The user can view his/her stocks and sectors, and perform technical analysis, and fundamental analysis. �� The user can also be alerted to any noteworthy events. �� The user can also purchase stocks using any of our stock brokers, and can monitor the performance of the stocks that he/she has picked. �� The user can also view his/her portfolio. �� There is no limitation to the number of stocks that we sell, and the free trial for our services extends for 30 days. �� The user also has the option to periodically restart the application. �� The price that we charge for our services is based on the amount of data that we download and on the stocks that we price. We also charge a small fee for stocks that are changed to premium. �� There is also a separate application for fund tracker users. If the user decides to purchase our services to get more detailed fund tracking and analysis, he/she can get this service at a very competitive price. �� Our services are also free for the user who is using a fund tracking application. �� The data that we download are generated using a very wide variety of sources, and our unique algorithms are utilized to generate a comprehensive set of reports. This unique approach of using statistical algorithms and the use of complex mathematics is clearly evident in the details that we provide to our users. �� The complexity of the mathematical formulas used for generating the data makes our algorithms very user friendly, and for the complex mathematical operations and data manipulation that we perform on all the data we receive, we will receive your data instantly. This makes

What's New in the Equity Evaluator Stock Quotes, Analysis, Picks?

The stock market is pretty tricky to analyze technically (long term or short term), let alone fundamental (like P/E or Yield to Maturity) analysis. Having said this, the technical analysis of the stock market is very important. The size of a company is not the only important factor in financial analysis. The share price is also very important. At Equity Evaluator we try to combine all these factors (price, size, and time) to give investors the best opportunity to gain profits. With this in mind we have developed our Equity Evaluator Stock Quotes Analysis Picks. Our Equity Evaluator Stock Quotes Analysis Picks is able to do all the things that most stock analysis software are good at, but have never been able to combined into a single solution. This is because they have very different functions in mind (technical vs. fundamental).
