## What's New In?

That the beleaguered technology sector would suddenly do backflips upon hearing news the Fed was about to hike rates seems a bit far-fetched, but for tech at least it's not unheard of. In recent months, Apple, Microsoft and Facebook have all had to answer questions about the future impact of rising interest rates on corporate earnings. And even though we're more than a year away from the Fed's next rate hike, tech companies may be

preparing for the worst. On Friday, several Wall Street analysts were sent a copy of a letter from Standard Chartered, one of the world's largest banks with operations spanning around the globe, that warned investors to expect 10 percent growth to be "stretched" over the coming years, a statement befitting one of the world's largest technology companies. Finally, Nadella's new vision for Microsoft doesn't seem to have anything to do with "technologies." Rather, it calls for business processes and more "consumer-like" experiences, perhaps even more than what Windows and Windows Phone are already delivering. His vision is a culmination of Microsoft's Mobile Now, Mobile Everything and Mobile Everywhere strategies, a clear break from what former CEO Steve Ballmer has been pursuing. Last month, Microsoft's growth was hit by the slow sales of Windows 10 and its new Surface line of devices. In a conference call with analysts, CEO Satya Nadella said that the company expects revenue to drop in the fiscal fourth quarter, a reversal from its earlier projection for a 10 percent rise. Some analysts attribute the profit slide to Microsoft's release of Windows 10, which launched in July.

Under the Radar Special: Carlisle Art by Carlisle  
The Underside of The Bar's BSD Series: In the last issue of The Bar's BSD series we focused on a few local American-based breweries that release excellent BSD beer. Carlisle (Harrington, Maine) is a relatively small brewery (production is in the 9,000 to 11,000 barrel range), but their beer exhibits the perfect balance of core craft beer qualities of bold and citrus-forward forward, strong malt character, a crisp medium body, and a clean palate. Like several breweries with moderate to high production volumes, the beer is released by the distributor because a brewery cannot always make enough to support their own distribution. Therefore, the beer is not always available to the public at retail. Carlisle's Sweetness is a 6.5%
