Serious Sam 4 will feature the new DirectX 12 API for improved game performance and it will be available on Windows PC, Xbox One and Xbox One S this Summer. Global was announced by 2K today, after its acquisition by Chartboost, as the exclusive digital-only network for 2K Sports and 2K Play. This partnership will allow players to download, watch and keep copies of the FIFA 18 demo that was released in September. A new global licensing agreement has been reached with the Canadian Football League (CFL) through which 2K players can now choose the official CFL video game of football on the Xbox One. The Season Mode, playable only in offline, creates a more authentic match experience through the introduction of real-life player motions. Players will be able to choose a team, after winning their draft, and in addition to customizing their player's attributes, the owner's ability and management, match and season challenge progression all will be within player's control. Microsoft, 3rd party developers and digital retailers in North America are now required to bundle Battleborn in

Xbox Game Pass, a subscription that gives unlimited access to over 100 AAA games for \$10 per month. EA responded to fan criticism by offering refunds or credits of up to \$15 if players bought FIFA Ultimate Team with cash or on an unverified credit card. An in-game message is displayed when cash is used to sign-up for Ultimate Team. Microsoft and Sony, however, do not make such an offer and many point to this as a missed opportunity. These are just some of the fan-requested features that were added to FIFA 18 over the past year, including:

## **Fifa 22 Features Key:**

- Screens and graphics are crisper than ever.
- Direct Player Pass lets you decide the best way to move the ball, depending on circumstances and the player.

Players evolve, emotions drive the pitch. Over 20 seasons, the FIFA series has become the world's most-watched and played game, and this year FIFA brings the drama of the world's biggest competitions home.

Powered by Football™, EA SPORTS™ FIFA 22 brings the game even closer to the real thing with fundamental gameplay advances and a new season of innovation across every mode. Innovate for a new era of gameplay. The power of the P&W engine is driven by features that deeply differentiate FIFA from other soccer games on the market, and has changed the way the world plays. These include new player intelligence: dominant attributes, unique skills, vision and reactions. Combined with built-in physics for movement and changes in momentum, players now move more fluidly and feel more connected. Players can also now choose an individual playing style, in turn allowing coaches to have a greater level of control over how their team plays. The true ball intelligence of P&W lets players react

instinctively to make use of all available space on the pitch, and adapt in real-time to keep possession or attack more directly. Players and teams can also be used as building blocks in construction projects, with unique abilities. Face-offs are now also available across the pitch, including new goals, throw-ins, corners and set pieces. The impact of the P&W engine extends far beyond gameplay: FIFA's new 1:1 motion capture captures exceptional, authentic movement. Powered by Football™, the game's visuals are further enhanced by the addition of new graphical features. The game engine's lighting, crowds, and day and night cycles have been improved, increasing the fidelity of in-game lighting on players and the field. Furthermore, on-field team subs and player celebrations are now reflected realistically in the backdrop. The effect of team subs is all-new, and, for the first time, players can take part in a post-match celebration that lasts a few seconds, emulating the time a coach takes to make a substitution during a match. EA SPORTS™ FIFA 22 captures all the beauty of these moments. The game's aesthetics continue to evolve and improve. Player and clothing elements are now more nuanced, looking even more detailed and realistic. bc9d6d6daa
