Creating HyperMotion Technology 1. Weights are added to the player animations based on weight and size, to provide a range of gaits that are authentic to the player. 2. Weights are then assigned to the animations by comparing them to the real-life player. 3. Animations are weighted to match the control style of the player, then tweaked and refined based on data such as total distance, acceleration, player acceleration, and changes to each dimension for a more authentic representation of the player. 4. New types of body gestures are recreated with MotionBuilder and used for new animations to make the animation more realistic, and to produce an even more authentic and exciting on-screen representation of the player. Achievements This milestone introduces an all-new “Achievement” system that rewards players for completing any gameplay activities. Those achievements reflect the game’s continued commitment to providing gameplay and feature content that appeals to the worldwide audience of all FIFA players, in all aspects of the game. Achievements are an essential part of FIFA and have always driven players to go further. Now, with the introduction of a new category of achievements in FIFA, we’re creating rewards that reflect this evolution in the game. These are available through gameplay and in-game, and reward players for their experience and dedication in the game. Creative Vision The next step in the evolution of FIFA, “Creative Vision,” provides players with more flexibility and greater choice when crafting their own footballing paths. Storyline The first “Storyline” is a journey that takes you through the history of FIFA, from the World Cup in Brazil 2014 to the launch of the game itself. Within it, you’ll find a journey through the history of football, from the first ever FIFA tournament, back to 1930 and beyond. Be a Part of FIFA 21 Community As FIFA continues to grow into a global franchise, the community of players around the world will continue to play a major role in that growth. For this reason, we’re getting gamers together in multiple ways with a special program called “The Global Series,” bringing players from around the world together into a series of community events. These interactions are broadcast to other parts of the world via “The Mixer” community platform. “FIFA
