Licensing The licensing model for AutoCAD is based on a perpetual license that allows the owner to use the program on any computer at any time for any reason. It also gives the right to use the product in the first place. Originally, AutoCAD was sold as a perpetual license for $5,000. It was also common for corporations to allow users to use AutoCAD software for free as long as they maintained the software. With the introduction of desktop virtualization, there is no longer a need to have a computer with AutoCAD installed, since the software is capable of running virtually. As of 2014, the price of the license has risen to $10,000. In January 2015, it was reported that the cost to renew the license had risen to $15,000 per year.
