BAPCo MobileMark 2005. BAPCo MobileMark 2012.rar rarQ: How to make a key-value pairs input in json in Java I am developing an application where user should enter key-value pairs. I can save this by using a JsonWriter, but my requirement is that a JsonReader should read and read data from this format. JSON: { "name": "John", "Salary": "Rs.20000" } I need to read this in Android. Any help is appreciated. A: The JSON format you are using is actually the entire tree structure, so this is not possible. The JsonReader can be used only for reading the json format, not
