### **Electromagnetismo Conceptos Y Aplicaciones Marshall 12**

I bought this to bring a little new tech to my climate-controlled werkwandtenhaus "bio-mineralised" washer. I very much like the result. Good work! I consider you to be my de facto "Jeweler" (my surname is "JEWELS", for the science ludekard!) I am glad that you have shared the use of this project with the rest of the world, as you were before I had the opportunity to have the ceramic gemstone loaded into the internal washer. I am a new member of this hobby and a novice. I am a Canadian, in the North of the country. I keep my lab on a wood floor. I have already received, a few days ago, a picture of

---

the beautiful lady that was your inspiration for this project. The ceramic gemstone that is in the picture is already in my house, in the kitchen. How do you think I feel? I am enjoying this hobby very much. Regards, Daniela V. LONDON, UNITED KINGDOM you have not answer my request...I ask you to share this project to all other members of this forum (all will be very interested to see it!). When somebody tries to execute this project...please send me in PM to see. I am very curious! good evening Luca After following the tutorial on how to make a jewelry box, I did another box in 1/2 scale for my boyfriend, he loves pink so the other color was pink too. I modified the metal cap with an enlarged one and the edges of the lid are rounded, the inside lid is a solid piece, and the inside is slightly smaller. I might add some silver jewelry on the lid, but just to see how it looks. hello everyone i found that this project is also very simple...and it is about me. i have also made this project, working in 1/2 scale, and it was easy, very easy i had put some sandpaper on the ends of the washer and on the handle, so it becomes more glittering...and i also use another scheme of the washer...and my kitty felix in the bottom of the box... i am going to sell it for 90 euro in the e-world...you can buy it with credit card. a big thanks to the creator. from italy the wire is very simple, you
